ORDER:-

In the reference read above, the Chief Engineer, Godavari Lift Irrigation Scheme, Warangal has stated that J. Chokka Rao Devadula Lift Irrigation Scheme is designed to cater 6.406 lakh acres with the water allocation of 38.16 TMC. Based on the part ayacut released so far, it is felt that in order to irrigate proposed ayacut, the water allocation to this project is not sufficient (as per norms) Hence, the Chief Engineer, Godavari Lift Irrigation Scheme, Warangal has recommended to allocate 60 TMC of water including drinking water requirement.

2. The matter was placed before the State Level Technical Advisory Committee. The Committee in its meeting held on 24-12-2014 discussed the issue in detail and recommended in principle to take up the enhancement of use of water under J. Chokka Rao Devadula Lift Irrigation Scheme Project from present level of 38 TMC to 60 TMC. This would be met from overall allocation earmarked for the project falling within the territorial jurisdiction of Telangana State.

3. The Chief Engineer, Godavari Lift Irrigation Scheme, Warangal has therefore, requested to issue orders for enhancement of use of water form river Godavari under J. Chokka Rao Devadula Lift Irrigation Scheme Project from present allocation of 38 TMC to 60 TMC.
